## EXPERIENCE

Oct. 2017 - now

### FREELANCER

Realization of web applications in billing and management of human resources. I specialize in javascript stacks such as M.E.V.N or M.E.A.N., as well as on cloud projects on AWS.

 VueJS, Vuex, Angular, NodeJS, MongoDB, MySQL, PostgreSQL, Express, Redis, Docker, AWS.

Feb. 2017 - Feb. 2018

### HUB COORDINATOR

EPITECH Programming School - Bordeaux, FR  
Head of the innovation division at the EPITECH programming school. In parallel with the logistical tasks, it is a question of ensuring the follow-up and the rating of the projects of the students.

Feb. 2017 - Jul. 2017

### TEACHING ASSISTANT

EPITECH Programming School - Bordeaux, FR  
EPITECH students supervision. Surveillance of tests, grading students' work, teaching and supervision of practical courses.

 C programming, Unix system.

Jul. 2016 - Dec. 2016

### SOFTWARE DEVELOPPER

NP6 Solutions, Customer Data Platform - Bordeaux  
Realization of a web application named "Data Flow" for the employees and the customers of the company. The goal is to quickly and easily create programs like import and export using a graphical interface. It is also possible to schedule the execution of programs from the platform.

 Angular, NodeJS, Mongodbs, Redis, Docker, Kubernetes, Python

## MY PROJECTS

Mar. 2018 - now

### HOLO - EPITECH INNOVATIVE PROJECT

Holo is a software created under the Unity3D graphics engine, allowing gesture control of objects or 3D holographic scenes. This is my final project at EPITECH. The purpose of the EIP (Epitech Innovative Project) is to create a marketable and innovative product.

 Unity3D, C#, NodeJS, MongoDB, VueJS.

Apr. 2018

### REDBULL KUMITE 2018 ASSISTANT ORGANIZER

Participation in the organization of the competition RedBull Kumite (around the game Street Fighter) in Bordeaux.

Mar. 2016 - Jul. 2016

### VOLUNTEER FULL-STACK DEVELOPER

Within a team of 6 Epitech developers, and in conjunction with design, law, and communication teams, we created for the Euro 2016 (The European Soccer Championship) a Web and a mobile application of prognostics. This project, certified by French Tech and Bordeaux Metropole, gathered more than 1600 players. This was my first project in a multi-disciplinary team.

 AngularJS, NodeJs, MongoDB, Android.
